

# Our Award Winning Parenting Support Team.

Based within our Central District Locality Early Help Hub, the team provide support sessions for parents from across Manchester. As well as supporting families at an Early Help level, they also provide support to parents/families who are experiencing a higher level of need.

## How to access this service?

- A Strength Based Conversation has resulted in you completing and registering an EHA. Support with parenting has been identified as one the areas of need. You can then submit your request for Early Help support. This will highlight the need for support around parenting and other areas of need you are not able to meet.
- Alternatively families may be receiving multi agency support at a higher level of need, involving a lead Social Worker. Once a Child and Family Assessment (completed by the S.W) is underway the lead Social Worker can make an (internal agency) request for support with parenting.

To identify and contact other agencies offering support on issues impacting on parenting. Just click on the image on the right.
